MORAN, TIMOTHY J

ART UNIT	PAPER NUMBER
2878	

DATE MAILED: 06/14/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)
	09/666,301	MARTIN, ROBERT J.
	Examiner Timothy J. Moran	Art Unit 2878

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 16 May 2002.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-11 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) The proposed drawing correction filed on _____ is: a) approved b) disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) The translation of the foreign language provisional application has been received.
- 15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: The present status of all applications mentioned in the specification should be stated. For example, a patent has been issued for the application mentioned in page 11, line 15.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Regarding claim 1, the specification does not teach a method of switching a charge well based on a brightness of a target, specifically a method of determining said brightness, and a method of determining the proper time for switching.

Regarding claim 4, the specification does not teach a method of varying an integration capacitance based on a brightness of a target, specifically a method of determining said brightness, and a method of determining the proper capacitance variation.

Regarding claim 5, the specification does not teach a method of switching a charge well based on a range to a target, specifically a method of determining said range, and a method of determining the proper time for switching.

Regarding claim 6, the specification does not teach a method of switching a charge well based on a range to a target, specifically a method of determining said range, and a method of determining the proper capacitance variation.

Regarding claim 7, the specification does not teach a method of switching a charge well based on a rate at which moving charges fill a charge well, specifically a method of determining said rate, and a method of determining the proper time for switching.

Regarding claim 8, the specification does not teach a method of switching a charge well based on a remaining capacity of a charge well, specifically a method of determining said capacity, and a method of determining the proper time for switching.

Regarding claim 10, the specification does not teach a method of varying an integration capacitance based on a rate at which moving charges fill a charge well, specifically a method of determining said rate, and a method of determining the proper capacitance variation.

Regarding claim 11, the specification does not teach a method of varying an integration capacitance based on a remaining capacity of a charge well, specifically a method of determining said capacity, and a method of determining the proper capacitance variation.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2878

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5-6, 8, and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 5, it is not clear whether the limitation "based on a range to the target" replaces or is in addition to the limitation "based on a brightness of a target" in claim 1. Note that it is improper for a dependent claim to replace a limitation recited in a claim on which it depends.

Regarding claim 6, it is not clear whether the limitation "based on a range to the target" replaces or is in addition to the limitation "based on a brightness of a target" in claim 4. Note that it is improper for a dependent claim to replace a limitation recited in a claim on which it depends.

Regarding claim 8, it is not clear whether the limitation "based on a remaining capacity of the first charge well" replaces or is in addition to the limitation "based on a rate at which the moving charges fill the first charge well" in claim 7. Note that it is improper for a dependent claim to replace a limitation recited in a claim on which it depends.

Regarding claim 11, it is not clear whether the limitation "based on a remaining capacity of the first charge well" replaces or is in addition to the limitation "based on a rate at which the moving charges fill the first charge well" in claim 10. Note that it is improper for a dependent claim to replace a limitation recited in a claim on which it depends.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy J. Moran whose telephone number is 703-305-0849. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank Font can be reached on 703-308-4881. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7724 for regular communications and 703-308-7724 for After Final communications.

Art Unit: 2878

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
